PROFESSIONAL SUMMARY

Enthusiastic Computer Science graduate, experienced in the analysis and optimization of enterprise-level healthcare applications at Nawaloka Hospital. I am passionate about tackling complex technical challenges and have a proven track record of developing functional web solutions that bridge the gap between user needs and software requirements. I am a dedicated problem-solver, eager to contribute my technical foundation and collaborative mindset to an innovative engineering team to deliver high-quality, user-focused software.

WORK EXPERIENCE

IT Operations & Systems Intern – IT Department
Nawaloka Hospital PLC, Colombo, Sri Lanka
March 2025 – Oct 2025

- Conducted comprehensive on-site analysis of the Hospital Information System (HIS) to identify logic flaws and workflow bottlenecks, proposing technical solutions to improve system efficiency
 - Acted as a bridge between end-users and the development team, translating complex clinical requirements into technical Change Request (CR) documentation for system enhancements.
 - Investigated software escalations and database inconsistencies, performing detailed debugging and root-cause analysis to support long-term system stability.
 - Participated in cross-departmental technical meetings to define software requirements, ensuring that proposed fixes aligned with both user needs and technical constraints.
 - Documented system bugs and user feedback in an organized manner, helping the engineering team prioritize high-impact updates in the development pipeline.
-

EDUCATION

- **BSc (Hons) in Computer Science – First Class Honors**
University of Bedfordshire, UK (Affiliated with SLIIT) | *Convocation Pending: March 2026*
 - **Higher National Diploma (HND)**
SLIIT City Uni | *Oct 2022 – Dec 2024*
 - **Assured Diploma in IT (Distinction)**
ESoft Metro Campus | *2024*
 - **Assured Diploma in English (Merit)**
ESoft Metro Campus | *2024*
 - **GCE Advanced Level – Physical Science (English Medium)**
Bandaranayake College Gampaha | *2021*
-

PROJECT EXPERIENCE

- **Edu Mate – AI-Powered Web Assistant (React, spring boot, PostgreSQL) | [\[View on GitHub\]](#)**
Individual Final Year Project. Engineered an intelligent Q&A tool using Retrieval-Augmented Generation (RAG) to provide precise answers extracted exclusively from uploaded lecture PDFs. Implemented role-based access control for Students, Lecturers and Admins, including secure registration with email verification.
-

- **SmartMart – Agile E-Commerce Application (React, Node.js, JavaScript) | [[View on GitHub](#)]**
Backend Developer (Group Project). Contributed to the development of a full-stack e-commerce platform within an Agile/Scrum team. Engineered the server-side logic for core modules, including real-time stock management, administrative control panels, and secure user management systems.
- **Fruity Brain – Interactive Game (PHP, JavaScript) | [[View on GitHub](#)]**
Individual Project. Developed an engaging browser-based game featuring three progressive difficulty levels (Easy, Medium, and Hard). Built a real-time leaderboard and "Top Player" scoreboard by integrating APIs for data management. Enhanced the user experience with a polished interface, interactive animations and custom game audio.
- **DNK Super – E-Commerce Platform (PHP, MySQL) | [[View on GitHub](#)]**
Lead Backend Developer (Group Project). Architected the entire backend system, delivering features for shopping carts, user authentication, purchase tracking and complex stock management.
- **Student Enrollment System (C#, MySQL) | [[View on GitHub](#)]**
Individual Final Project. Developed a desktop application featuring a modern UI, efficient CRUD data operations and advanced search functionality for student record management.

TECHNICAL SKILLS

- **Frontend:** JavaScript, Bootstrap, HTML5, CSS3, React.js, AJAX
- **Backend:** Java, PHP, Typescript, SQL
- **Frameworks:** Spring boot, Node.js
- **Databases:** PostgreSQL, MySQL
- **Other:** Git, Jira, Trello

PROFESSIONAL SKILLS

- **Problem Solving:** Strong analytical capability with a focus on algorithmic logic and debugging.
- **Collaboration:** Experienced in group projects and Agile/Scrum team environments.
- **Adaptability:** Proven ability to rapidly learn new frameworks.
- **Time Management:** Efficient at balancing strict academic deadlines with complex project development.

LANGUAGES

- **English:** Professional Proficiency
- **Sinhala:** Native Speaker
